EDUCATION

SRM Institute of Science and Technology , Chennai, India

Aug 2023 — May 2027

Btech. in CSE with specialisation in Blockchain Technology

GPA: 8.30

SKILLS

Programming Languages: C++, C, JavaScript, TypeScript, SQL, Solidity

Web & Development Technologies: HTML, CSS, ReactJS, NextJS, NodeJS, Git, GitHub, Tailwind CSS

Cloud, DevOps & Security: AWS, GCP, Docker, Kubernetes, Docker, Terraform, GitHub Actions, Jenkins, Cloud Security, Monitoring & Observability, Prometheus, Grafana

Non-Technical Skills: Social Media Management, Sales, Marketing Automation, Digital Marketing, Online Content Creation

LEADERSHIP EXPERIENCE

Founder and Sales Director

Mar 2023 — Dec 2023

PuzzlePiece Digital

Remote

- Implemented targeted cold outreach campaign, generating a 30% increase in qualified leads and expanding customer base by 18% in 6 months by A/B testing messaging, segmenting prospects, and leveraging multichannel contact strategies.
- Developed and implemented a chatbot integrated with Facebook Ads to enhance customer engagement and lead generation.
- Offered digital marketing services to Airbnb niche clients, gaining hands-on experience and expanding my portfolio.

Corporate Lead

Sep 2023 — May 2024

SRMKZILLA Club (SRM)

SRM Chennai, India

- Targeted corporate sponsors with cold outreach strategies and secured funding for flagship events MOZOFEST and MOZOHACK.
- Collaborated with cross-functional teams to secure funding and resources, enhancing event scale and impact.

PROJECTS

Block Vote - Decentralized Voting System | React, Node.js, Express.js, Ethereum Smart Contract- Truffle, Metamask

Nov 2025

- Developed a secure blockchain-based voting app using React, Node.js, and Ethereum smart contracts, ensuring 100% transparent and tamper-proof vote recording.
- Integrated Metamask for blockchain interaction, enabling decentralized voting with enhanced security and transparency.
- Implemented user authentication with JWT and bcrypt, including OTP email verification via Gmail using Nodemailer.

Three-Tier DevSecOps Web Application | React.js, Node.js, Terraform, AWS, Jenkins, ArgoCD, Docker,

Mar 2026 — Apr 2026

Kubernetes, SonarQube, Prometheus, Grafana

- Provisioned end-to-end AWS infrastructure (EKS, VPC, Jenkins, ECR, S3, DynamoDB) using Terraform IaC, reducing environment setup time to less than 30 minutes and eliminating 100% of manual provisioning steps.
- Engineered a secure 8-stage CI/CD pipeline with Jenkins, ArgoCD, and integrated security scans, reducing deployment time to less than 15 minutes and achieving 0 critical vulnerabilities in production.
- Implemented Kubernetes-based monitoring and scaling with Prometheus, Grafana, and HPA, achieving 99.9% uptime with auto-scaling response within 60 seconds and alerting latency under 2 minutes.

Autonomous Incident Commander (AIOps) for Kubernetes | AWS, Docker, Kubernetes, Github Actions, ArgoCD,

Apr 2026

Prometheus, Grafana, Python, LangChain, OpenAI API / open-source LLMs, Vector DB, REST APIs

- Developed an autonomous incident response agent integrating Prometheus, Grafana, and Loki, reducing MTTR by 60% through automated log, metric, and alert correlation.
- Engineered an AI-driven remediation workflow using Kubernetes and ArgoCD, automating rollback, restart, and scaling to resolve 70% of critical incidents without manual intervention.
- Implemented intelligent alert deduplication and prioritization logic across multi-service environments, cutting alert noise by 50% and improving on-call response efficiency by 40%
